PROFESSIONAL SUMMARY

Final-year Computer Science student with hands-on experience in data-driven software projects, process automation, documentation, and cross-functional problem solving. Proficient in Excel, Google Sheets, SQL, Python, and modern AI tools, with experience organizing information, analyzing data, building dashboards and automated workflows, and translating requirements into practical solutions. Strong communication, attention to detail, execution discipline, and willingness to work across business and operations functions.

EDUCATION

Parul University Sep 2023 – Present Bachelor of Technology (B.Tech) in Computer Science and Engineering CGPA: 8.0/10

Sri Viswa Jun 2021 – Jul 2023 Intermediate (Science – MPC Stream) CGPA: 7.8/10

PROJECTS

SentinelOps — Go, Java, PostgreSQL, Redis, LLMs

- Built an AI-powered incident monitoring platform to track system activity, identify anomalies, and support timely operational decisions.
- Designed automated workflows for analyzing incidents and generating structured root-cause reports and remediation recommendations.
- Organized operational data using PostgreSQL and Redis while developing backend services for reliable data processing and reporting.

ZeroShare — React, TypeScript, PostgreSQL, Docker

- Developed a secure file-sharing platform with structured workflows for user authentication, file management, and information organization.
- Built REST APIs and PostgreSQL data models to maintain accurate and accessible application records.
- Documented application workflows and containerized the system using Docker to improve consistency across environments.

AI Legislative Analyzer — Python, Gemini API, RAG

- Developed an AI-powered document analysis platform to process large volumes of legislative information and generate structured summaries.
- Built semantic retrieval workflows to identify relevant information and support context-aware analysis.
- Automated repetitive document-analysis tasks using Python and GenAI workflows, improving consistency and reducing manual effort.

SKILLS

Business Operations: Data Analysis, Reporting, Process Analysis, Documentation, Task Tracking, Problem Solving, Process Improvement

Data Productivity: Microsoft Excel, Google Sheets, SQL, Data Organization, Dashboards, Trackers

Programming: Python, Java, Go (Golang), TypeScript

AI GenAI: ChatGPT, Prompt Engineering, LLMs, RAG, AI Agents, Gemini API

Databases Tools: PostgreSQL, Redis, MongoDB, Git, GitHub, Docker, Linux

Cloud DevOps: AWS, Kubernetes, GitHub Actions, CI/CD

CERTIFICATIONS

- Oracle Cloud Infrastructure (OCI) Generative AI Professional
- Oracle AI Foundations Professional
- AWS Cloud Practitioner
- Vibe-level Certification
- DevOps Certification
