Objective

Computer Science undergraduate specializing in DevOps and backend engineering with strong hands-on experience in Linux, Shell scripting, and backend system development. Skilled in building scalable applications using Java, FastAPI, and modern web technologies, with working knowledge of Golang for high-performance backend tools. Strong foundation in Data Structures, Algorithms, and system-level concepts, seeking opportunities in backend, cloud, and DevOps engineering.

Education

Parul University

B.Tech in Computer Science and Engineering (Cloud Computing) – CGPA: 8.0/10

- **Scholarship:** 25% Merit Scholarship awarded for academic performance.

Aug 2023 – June 2027

Vadodara, Gujarat

Sri Vishwa Junior College

Intermediate (Science – MPC Stream) – 75.89%

June 2021 – April 2023

Vishakhapatnam, Andhra Pradesh

Projects

Multi-Agent Research Bot | Python, FastAPI, React.js, Vercel, AI Agent Orchestration

- Built a multi-agent research automation system executing structured workflows (Research → Analysis → Critique → Report Generation).
- Developed FastAPI backend services to orchestrate agent execution and manage stateful workflows.
- Implemented real-time log streaming between backend and frontend for execution transparency and monitoring.
- Designed an interactive React.js dashboard to visualize agent progress and generated reports.
- Deployed production-ready application on Vercel with modular and scalable architecture.

SentinelAI | Go, Gin, PostgreSQL, Docker, React, Vite

- Built an AI-powered API monitoring SaaS focused on backend reliability, automated health checks, and failure analysis.
- Developed backend services in Go + Gin using clean architecture and concurrent worker pools (goroutines) for scalable monitoring.
- Implemented scheduler-based checks, PostgreSQL data storage, and DTO mapping for structured API responses.
- Integrated Ollama LLM for AI-driven failure explanations and deployed services using Docker multi-stage builds.
- Built a React dashboard with JWT authentication and real-time monitor updates.

Cinematic Portfolio | Next.js, React, Vercel

- Built a cinematic-style portfolio using Next.js and React with SEO-optimized, high-performance UI.
- Implemented reusable components and responsive layouts for scalable frontend architecture.
- Configured environment variables and optimized production builds for deployment efficiency.
- Deployed and maintained application on Vercel with CI/CD-ready setup.

Technical Skills

Languages: Java, Golang, Python, Bash (Shell), SQL

Frameworks & Database: Spring Boot, FastAPI, React.js, Next.js, Vite, MySQL, PostgreSQL, MongoDB

DevOps & Cloud: Linux, Git, GitHub, AWS

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks, System Design, Database Design, Generative AI

Achievements & Certifications

- Oracle Cloud Infrastructure (OCI) – Generative AI & AI Foundations Professional
- AWS Cloud Quest – Cloud Practitioner
- DevOps Foundations Certification
- Golang Certification
- Python Certification
